Core Research Facilities & Services (CRFS)

The DZNE CRFS provides state-of-the-art services to scientists at the basis.

The aim of the CRFS is to offer to our scientists a broad range of diverse technologies that are required by a state-of-the-art research. Our well-trained and dedicated staff will support scientists in the use of cutting edge technologies to extract the maximum potential from the technology. Additionally, the CRFS allows for cost savings, economy of resources, and centralization of research functionality.

To learn more about the CRFS or to request a service from one of our cores, please contact the Head of CRFS, Dr. Eugenio Fava.
